## SUMMARY

Graduate of the University of Minnesota Coding Boot Camp, May 2019. Studied full-stack web development, including JavaScript, jQuery, React.js, MySQL, MongoDB and Node.js. Detail-oriented, thorough, and take direction well. Coding for accessibility is a special area of interest. Looking for an internship or an entry- or junior-level programmer position.

---

## TECHNICAL SKILLS

- |              |            |
|--------------|------------|
| • HTML       | • Node.js  |
| • CSS        | • React.js |
| • JavaScript | • MySQL    |
| • JQuery     | • ORMs     |

---

## SELECT PROJECTS

**When I Was 18** | Link to Github: <https://github.com/sindygeb/incredible-ninjas>

Link to deployed site: <https://sindygeb.github.io/incredible-ninjas/>

### Front End Developer

*This was the first group project for the University of Minnesota Coding Boot Camp. The site uses an API that makes an educated guess about your age based on the picture you provide. Using the results, it displays the top 10 songs from the year you were 18.*

Requirements:

- Must use at least two different APIs
- Have a form of user authentication.

My role:

- Responsible for building the front end pages
- Coding the visual design created by a group member

Tools/languages used:

- JavaScript
- Face++ API
- Google Firebase
- JQuery
- Ajax
- Bootstrap
- CSS Animate

## Back End Developer

*This was the final group project for the University of Minnesota Coding Boot Camp. The site's purpose was to allow musicians who want to jam with other musicians to connect with one another. Users created an account and entered the instrument they played and their skill level. Musicians could also create jam sessions for other musicians to join.*

### Requirements:

- Must use React, Vue, or Angular in some way (even if minimal)
- Must use a Node and Express Web Server
- Must be backed by a MySQL or MongoDB Database with a Sequelize or Mongoose ORM
- Must have both GET and POST routes for retrieving and adding new data
- Must be deployed using Heroku (with Data)
- Must utilize at least two libraries, packages, or technologies that hadn't been covered
- Must have a polished frontend / UI
- Must have folder structure that meets MVC Paradigm
- Must meet good quality coding standards (indentation, scoping, naming)

### My Role:

- Responsible for front-end to back-end communication
- Structuring the database tables and relationships, using MySQL and the Sequelize library
- Helping structure the layout of React components

### Tools/languages used:

- |                       |                   |
|-----------------------|-------------------|
| • JavaScript          | • Node.js         |
| • React.js            | • Express.js      |
| • JSX                 | • React Bootstrap |
| • MySQL and Sequelize |                   |

---

## WORK EXPERIENCE

### **Front End Courtesy Clerk, 2016-2017** Lunds & Byerlys – St. Paul, MN

Responsible for bagging and carrying the groceries to the customers' cars. Performed miscellaneous duties such as cleaning, restocking front-end supplies, and helping close the store.

### *Key Accomplishments:*

- Recognized by management when several customers called in to compliment me for providing excellent service.

---

## EDUCATION

**University of Minnesota**, St. Paul, Minnesota – Full Stack Web Development Boot Camp

**Cyber Village Academy**, St. Paul, Minnesota – High School Diploma
